The Survey of Business Owners released on April 26, 2011 estimates that there are an estimated 308,514 Asian Indian owned businesses in the United States with \$152 billion in revenue, employing 850,191 people with an annual payroll of \$26 billion.

The survey gives us a detailed landscape where these businesses are located both geographically as well as in terms of industrial sector.

In comparative terms the receipts of Asian Indian owned firms is larger than the state GDP of 21 states including Kentucky and Iowa and almost as large as the GDP of the wealthiest state in India – Maharashtra. In terms of employment, Asian Indian owned firms as a group employ more people than most of the largest Fortune 500 companies. For example, McDonalds employed 385,000 people according to Fortune Magazine, 2010.

The top three sectors for these businesses were computer systems design and related services, office of physicians and traveler accommodations. However in terms of aggregate revenue the largest sector was gasoline stations. In terms of employment the largest sectors were traveler accommodations, computer systems design and related services and limited service restaurants.

The top states for Asian Indian owned businesses were California, New York, Texas, New Jersey, Illinois, Florida, Georgia, Virginia, Pennsylvania and Maryland.
